Summer Fire Safety By Bill Pindle

Cooking grills too close to buildings-Keep a minimum of 10ft away from buildings and do not use grills inside a building whatsoever, do not store LP gas tanks inside, best to store them outside.

Window unit air conditioners-these units overload the smaller and older circuits in your home. Be sure that your electrical wiring is capable of handling the power needed to run these units.

Swimming pools-keep your pools in safe condition. This includes the electrical and the limited access to your pool area. Any questions that you might have, feel free to give me a call at 315-633-9333.
